

ISO 27001

ISO 27001 certification is for Information Security Management Systems and is one of the most widely recognized and prestigious security standards available. By achieving this certification Curvature has confirmed that our ISMS is compliant and in line with the latest industry standards and best practices.

ISO 9001

Curvature maintains a robust quality management system (QMS) under its ISO 9001 certifications. Curvature is among an elite class of networking equipment providers that have achieved this level of quality control. The International Standards Organization is the governing body for these certifications. This prestigious recognition serves to validate Curvature's demonstrated ability to provide the highest quality levels of procurement and refurbishment services for the telecommunications industry worldwide.

C-TPAT

Curvature is a Certified C-TPAT Importer (Customs-Trade Partnership Against Terrorism). Led by U.S. Customs and Border Protection, C-TPAT is focused on improving global supply chain security with respect to terrorism.

ISO 14001

Curvature maintains ISO 14001 Environmental Management System (EMS) at the 839 Ward Drive Headquarters and Distribution Center in Santa Barbara, California. With our long history of refurbishing and reselling IT equipment, environmental responsibility is a fundamental principle at Curvature. Our commitment to the environment drives us to develop programs that encourage green IT practices by making them financially beneficial as well as environmentally friendly.

ISO 45001

Curvature maintains ISO 45001 certified Occupational Health and Safety Management System at the 839 Ward Drive Headquarters and Distribution Center in Santa Barbara, California. Curvature provides a safe and healthful workplace, by following all health and safety best practices and requirements for all operations. The 45001 standard guides all realms of safety in Curvature's EHS program. Following the guidelines of this program ensures that Curvature identifies all safety risks, reduces the potential for accidents, adheres to legal regulations, and continually improves safety performance.

R2v3 Responsible Recycling

Curvature maintains R2v3 certification at the 839 Ward Drive Headquarters and Distribution Center in Santa Barbara, California.

The R2v3 Standard provides a common set of processes, safety measures, and documentation requirements for businesses that repair and recycle used electronics. R2v3 is rigorously and independently audited, emphasizing quality, safety, and transparency. This certification is particularly applicable to our ITAD Asset Recovery business line—customers can be assured that their assets are handled properly and Curvature is following the proper data destruction practices.

Curvature's R2v3 scope includes downstream vendor management, logical and physical data sanitization, and testing and repair of IT assets.
